775-PC

Industrial dust and waterproof luminaires

Equipped with LED modules. 775-PC is available in the following sizes: 2x600mm, 1x1200mm, 1x1500mm, 2x1200mm, 2x1500mm

YOUR MAIN BENEFITS:

A professional luminaire for wide usage, that fulfils the strongest quality requirements. Especially for applications, where **high impact resistance (IK rating)** is required. Available in IP65 (or optionally also IP66 or IP67).

FIELD OF APPLICATION:

Due to the construction principles of the gasket, the closing system and the diffuser our fixtures ensure a high grade of protection (IP65 or IP66) against dust, contamination and water permeation. (Optionally available in IP67). In accordance with their IP-grade they can be used widely to illuminate spaces with dusty and humid environment. Thanks to its **enhanced impact resistance**, 775-PC is especially suitable for applications, where **a high IK impact rating** is required.

When using outdoors, the fittings should be protected against direct sunlight and adverse weather conditions. Under 0°C the application of a venting cable gland is necessary, as well as the silicone gasket is recommended.

TECHNICAL DESCRIPTION AND BENEFITS:

- Housing: It is made of flame retardant injection moulded polycarbonate (PC) (suitable for 850°C glow wire test), in light grey (RAL7035) colour. This material has very high mechanical strength and allows us to reach an excellent shock resistance.
- The **diffuser** is available in the following versions: Injection moulded polycarbonate (PC), opal, with a shock resistance of IK10, with extremely high light permeability and well-balanced light dispersing.
 - As option injection moulded acrylic (PMMA) diffuser in opal version is available.

The diffusers are designed with respect to their optical characteristics and are UV resistant.

- The **gasket** between the diffuser and the housing is available in two versions:
 - Injected endless silicone foam
 - Non-aging PU (polyurethane) endless foam
- **Fixing of the diffuser to the body:** with highly resistant clips made of **stainless steel** (standard or tamperproof).
- Gear tray (reflector): White powder coated steel sheet according to Zhaga standards or customised.
- Electrical components: The adequsate power supply is ensured with the electronic driver, that is built into the luminaire.

IP65

Option:

LED

Main technical options

Our new opal diffuser has an outstanding light transmissivity of more than 90%. With this great light permeability, it is an **excellent** choice for luminaires equipped with LED modules.

The opal diffusers are made of UV stabilized opalised material, specially developed for LED applications. This ensures among others a well-balanced light distribution and the **elimination of glare**. Moreover the diffuser made of injection moulded polycarbonate (PC) excels at highest impact resistance of IK10.

The special tamper-proof stainless steel clips for non-SELV (HV) solutions can not be released with bare hands.

Usual stainless steel clips for **SELV** (Safety Extra Low Voltage) solutions.

2. Suspension on chains with stainless steel suspension brackets mounted with hooks.

1. With stainless steel

18 SOLUTIONS

Light sources suffer from

degradation in light output over time. The CLO feature enables LED solutions to deliver constant

775-PC with motion sensor

775-PC

CLO

In order to ensure **maximum heat**, chemical and weather **resistance** even under tough conditions, the **gasket** between the diffuser and housing is

made of **silicone** foam with

enhanced resistance.

Depending on customer requirements we can reach different levels of luminous flux (lumen) as well as luminous efficacy (lm/Watt) of our LED luminaires. For more details please see technical data.

In order to optimise the thermal management of the luminaire we avoid the direct contact of the gear tray and driver, thus increasing the lifetime of the modules and driver.
